

- **What role is attached to the Compute Engine default service account?**

Editor

- **Would it be sufficient for the VM to perform its functions (i.e. creating buckets and reading/writing objects in them)?**

Absolutely not. All the editor can do is create and delete resources for most google cloud services

- **What permissions are given by the default access scope to Cloud Storage?**

read-only access to Storage and Service Management, write access to Stackdriver Logging and Monitoring, read/write access to Service Control.

- **Would they be sufficient for the VM to perform its functions (i.e. creating buckets and reading/writing objects in them)?**

No! It would only be able to read from storage and service management

- **What settings are possible for setting the VM's access to the Storage API?**

Read only, write only, read write and full

- **What time did the latest earthquake happen?**

2025-02-06T02:26:12.630Z.

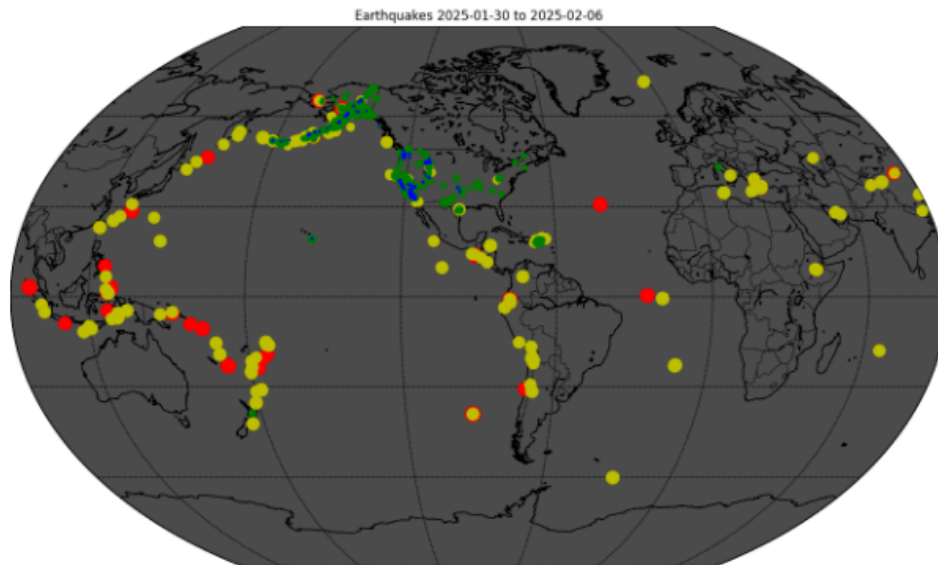

- **What was the magnitude (mag)?**

Its magnitude was 1.33.

- **Where was the place it happened?**

It occurred 17 km N of Ojai, CA.

- **Take a screenshot of the image that has been created for your lab notebook.**

- **What is the exact error message that is returned?**

```
jgafron@gcs-lab-vm:~$ gcloud compute instances list  
WARNING: Some requests did not succeed.  
- Request had insufficient authentication scopes.
```

Listed 0 items.

- **What role needs to be added to the service account's permissions for the VM to have access to list the project's Compute Engine resources?**

The “Compute Viewer” role

- **Take a screenshot of the output for your notebook.**

```
jgafron@gcs-lab-vm:~$ gcloud compute instances list
```

| NAME              | ZONE           | MACHINE_TYPE | PREEMPTIBLE | INTERNAL_IP | EXTERNAL_IP   | STATUS     |
|-------------------|----------------|--------------|-------------|-------------|---------------|------------|
| vm-europe-west1-d | europe-west1-d | e2-medium    |             | 10.132.0.2  |               | TERMINATED |
| course-vm         | us-west1-b     | e2-medium    |             | 10.138.0.2  |               | TERMINATED |
| gcs-lab-vm        | us-west1-b     | e2-medium    |             | 10.138.0.17 | 34.145.65.134 | RUNNING    |
| usgs              | us-west1-b     | e2-medium    |             | 10.138.0.12 | 104.198.4.112 | RUNNING    |

```
jgafron@gcs-lab-vm:~$
```

- What is the exact error message that is returned?

Copying file://moonquakes.png [Content-Type=image/png]...

AccessDeniedException: 403 gcs-lab@cloud-gafron-jgafron.iam.gserviceaccount.com does not have storage.objects.create access to the Google Cloud Storage object. Permission 'storage.objects.create' denied on resource (or it may not exist).

**What role needs to be added to the service account's permissions for the VM to have access to add an object to a storage bucket?**

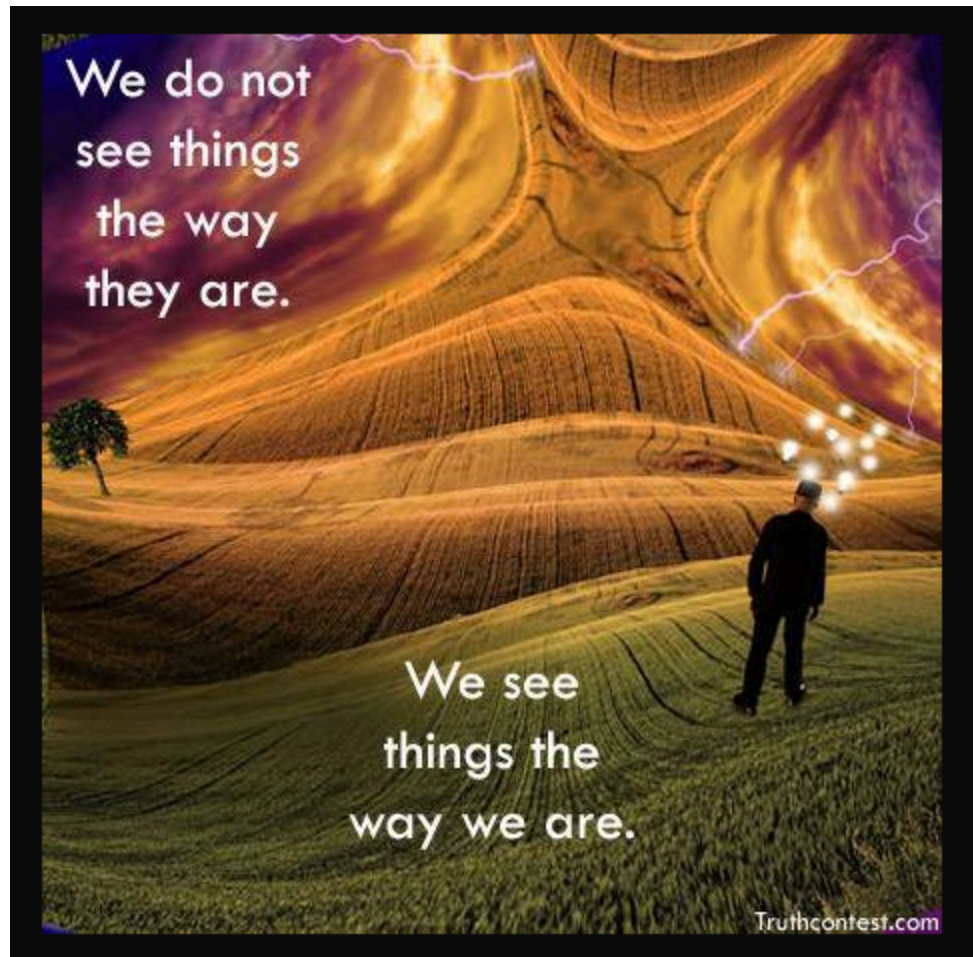

The storage object creator role

- Take a screenshot of the output for your notebook.

```
jgafron@gcs-lab-vm:~$ gsutil cp moonquakes.png gs://earthqukbucket/
Copying file://moonquakes.png [Content-Type=image/png]...
/ [1 files][312.2 KiB/312.2 KiB]
Operation completed over 1 objects/312.2 KiB.
jgafron@gcs-lab-vm:~$
```

- Take a screenshot the shows the entire URL and the image that has been retrieved:

```
>>> blob.public_url
'https://storage.googleapis.com/earthqukbucket/gcs-lab-image.jpg'
>>>
```

- Take a screenshot of the output for your lab notebook.
